

TMS Solution Design & Specification

Consolidated Chat Export - Project Documentation

1. System Architecture & Modules

CORE CLUSTERS

- **Governance:** Command Centre & HRMS Sync.
- **Content:** AI Research Engine & Course Management.
- **Experience:** Learner Dashboard & Gamification.
- **Deployment:** Verified Resume & RMT Portal.

2. Taxonomy & Skill Definitions

Standardized roles and skills with L1-L4 proficiency levels. Key features include competency benchmarking, inheritance logic, and "Hot Skill" tagging.

3. Learner & Employee Experience

KEY FEATURES

- **Talent Timeline:** Historical progress record.
- **Skill Confidence Meter:** Real-time expertise visualization.
- **Aspiration Tracker:** Goal-setting tool.
- **Verified Resume:** Proctored, PDF-exportable CV.

4. Course & Track Management

Full lifecycle control over internal and external courses. Includes authoring, track orchestration, and automated enrollment based on HRMS persona sync.

5. Migration & Legacy Onboarding

ETL pipeline for transitioning legacy data. Includes mapping engines, validation sandboxes, and conflict resolution tools to ensure data integrity during transition.

6. Administrative Governance

Admin Command Centre manages global weightage, taxonomy consistency, and immutable audit logs for every system transaction.
