

Course & Track Management

Full lifecycle control (Add/Edit/Modify) over internal/external courses and specialized learning paths.

CTM-01: Course Authoring & Metadata

KEY CAPABILITIES

- Hierarchical course structuring (L1-L4)
- Versioning and historical archiving
- Prerequisite logic enforcement
- Instructor and SME assignment

USE CASES

- L&D Admin creates a new 'Advanced NDT' course with 'Basic NDT' as a prerequisite.
- Updating safety training content for 2026 without losing 2025 completion records.

CTM-02: Track & Pathway Orchestration

KEY CAPABILITIES

- Bundle courses into career tracks
- Automated role-based track enrollment
- Elective and mandatory branch logic
- Milestone-based badge triggering

USE CASES

- Designing a 'Junior to Senior Developer' path requiring 10 core modules and 2 electives.
- Automatically enrolling new hires in the 'Company Culture & Safety' track based on HRMS sync.

CTM-03: Lifecycle & Status Control

KEY CAPABILITIES

- Visibility toggles (Draft, Live, Retired)
- Recertification and expiry cycles
- Department-specific course visibility
- Weightage-based point allocation

USE CASES

- Retiring an obsolete technology course while keeping it in the learners' history.
- Setting a mandatory annual refresher for 'Information Security' that auto-triggers every 12 months.
